

## HOW DOES GWP INCREASE WATER SECURITY

- Date: 13 April 2017
- Time: 12.45 - 13.30
- Location: UNESCO-IHE
- Contact person: Jacqueline Koot/ Zaki Shubber
- Guest speakers: Kenge James Gunya, GWP Knowledge Management Officer and Sara Oppenheimer, GWP Network Operations Programme Assistant

Managing the world's water resources is foundational to development. Sustainable development will not be achieved without a water secure world. A water secure world integrates a concern for the intrinsic value of water with a concern for its use for human survival and well-being. GWP will hold an interactive seminar on its programmes and projects in 13 regions and 85 countries. The seminar will address the following themes and questions. How can IWRM teaching be embedded in other water related disciplines (e.g. engineering)? What is GWP's approach in Youth and Gender in managing water? A focus on water and climate: how are we working to increase climate resilience?

GWP will also be present at the [Water Sector Market](#), 13 April 2017.

*Since 2014, UNESCO-IHE and the Global Water Partnership (GWP) have been collaborating to strengthen knowledge dissemination and practical application of Integrated Water Resources Management.*
