

# Certificate

**07GI0583**

This document is proof that

## **Global Water Partnership**

has offset the CO<sub>2</sub> emissions of 242.99 tons CO<sub>2</sub>,  
caused by flying in 2009.

Offsetting is realised with CO<sub>2</sub> reduction projects of  
Climate Neutral Group, mother organisation of GreenSeat. By  
reducing CO<sub>2</sub> in our atmosphere, these projects help counter global  
warming.

As an indication: to offset these emissions, on average a wind  
turbine has to be operational for 608 hours,  
or 12,150 trees have to grow for one year.

René Toet

Managing Director Climate Neutral Group  
Utrecht, 05-02-2010
