Description of the Assignment

GWP-Med is announcing the present Call for Offers for Development of the flood risk financing mechanisms in the Drin Basin in the framework of the The Integrated Climate-Resilient Transboundary Flood Risk Management in the Drin River Basin in the Western Balkans” (Drin FRM Project, 2019-2024)

The Integrated Climate-Resilient Transboundary Flood Risk Management in the Drin River Basin in the Western Balkans” (Drin FRM Project, 2019-2024) is executed by the UNDP (IRH) for the components 1 & 3 and the Global Water Partnership – Mediterranean (GWP-Med) for the component 2.

The objective of the project is to assist the riparian countries in implementing an integrated climate-resilient river basin flood risk management approach to improve their existing capacity to manage flood risk at regional,

national and local levels and to enhance resilience of vulnerable communities in the Drin River Basin (DRB) to climate-change induced floods.

Risk transfer mechanisms in the Drin riparians are scarce and there is a very limited activity in the region on government-initiated ex-ante risk transfer solutions. Supply and demand remain poor today and market forces are highly unlikely to induce any growth of the risk financing market without the implementation of pro-active measures.

In this regard, the Strategy for flood risk transfer proposes the implementation of 12 solutions (intervention measures/tools) to facilitate critical reforms in this area.

To further support the implementation of the Strategy, it is necessary to develop detailed feasibility study with appropriate technical analyses on priority risk transfer mechanisms as integral part of the process of comprehensive understanding the impact of the proposed risk transfer solutions on economies of the Drin riparians, to ensure that they are sustainable and acceptable in the long term.

For a detailed description of the Assignment, please refer to the respective ToR.

Procurement

The procurement will proceed having regard to:

Failure to provide the minimum required qualifications is considered ground for disqualification.

Scoring for each evaluation criteria starts from 100 points (when minimum requirements are met) up until maximum 150 points (100p Base +10p for extra criteria over base up to 50 additional points) .

Each Section/evaluation criterion is evaluated autonomously. The final scoring of each evaluation criterion is the outcome of its scoring multiplied by the corresponding weighting factor. The overall score of the technical offer is the sum of the final scoring of all the Sections/evaluation criteria

The overall score of the technical offer is calculated on the basis of the following formula:

$$B_i = w_1 \times c_1 + w_2 \times c_2 + \dots$$

For the overall score which will determine the ranking of offers, technical evaluation will be weighted with 80%, and the financial offer with 20%.

The final listing of the most advantageous offers will be made on the basis of the following formula:

$$\Lambda_i = 0.8 * (B_i/B_{max}) + 0.2 * (K_{min}/K_i).$$

Where:

- Bmax: the max score received by the best of the technical offers received
- Bi: the score of the technical offer
- Kmin: The cost of the financial offer with the minimum price offered.
- Ki: The cost of the financial offer

The most advantageous offers is the one with the greater value of Λ .

In case of equality of overall scores, the winning proposal is the one whose corresponding technical proposal received the highest rating.

Duration of the Contract

The overall duration of the contract will be maximum 8 months..
