

Gender statistics in Albania

Women and Men publication

Gender statistics

There is a dedicated publication Women and Men

It is a periodical yearly publication

This is the only dedicated publication for gender statistics with official data.

The first publication was on 2007. This publication was named Female and it was not yearly.

On 2014 it was the year when it was incorporated in the official publications of INSTAT.

Content

- The publication is structured in modules:
 - Population
 - Education
 - Employment
 - Decision making

...It has improved in terms of the indicators produced.

Another milestone was the incorporation of the gender statistics in the Official Statistical Program of 2017-2021. This makes obligatory for all the data providers to produce this types of statistics.

Data sources

Population statistics

- Gender variables incorporation in the vital statistics records.

Survey

- This makes obligatory for all the surveys to have the gender variables
- The challenge is the administrative data
- From a desk research it was estimated that 10% of the administrative data have the gender variable.

Actual situation

Now

- For the first time in January 2020 Albania was capable to produce the Gender Equality Index, inline with European recommendations. This made possible that it could be comparable with other European Countries in terms of gender achievements.

Gender Equality Index for the Republic of Albania 2020

Tirana, January 2020
